PROFILE

I found my purpose the moment my hands landed on a computer. Web Development has been my passion for many years. I have a burning passion to deliver compelling interactive web experiences. Below are projects that showcase some of my skills and background in developing software.

SKILLS

- o Web Development
- o JavaScript / ES6
- o UI/UX Design
- o Git / GitHub
- o MySQL

EDUCATION

Responsive Web Design

Free Code Camp
Developer Certification

JavaScript Algorithms and Data Structures

Free Code Camp
Developer Certification

User Experience Design Essentials - Adobe XD

Udemy
UI / UX Design Certification

EXPERIENCE

Cup Kayz Web App | californiadev.github.io/CupkayzV2.0/

Developed a Responsive E-Commerce Web App utilizing HTML5, CSS3, and JavaScript programming languages. Google API is used to render map points between delivery and recipient. Written in modern, performant, maintainable code. Crafted interactive wireframes before coding using Adobe XD.

Battle Ship Web App | californiadev.github.io/Battleship/

Based on the classic Battleship game, this application was designed in raw JavaScript code (no libraries). It manipulates the DOM elements to output the app onto an HTML5 canvas element.

Relies on both event handling and the use of objects.

Nybblebox Web App | californiadev.github.io/CupkayzV2.0/

Responsive Wordpress portfolio site. Developed with intentions to promote a small business product branding team. Nybblebox was built on the focus that product design was key to a business success. Clean modern and thoughtful designs.
